Risk Assessment Policy

Sophia High School is committed to ensuring the health, safety and welfare of all staff, students, visitors, and contractors by conducting thorough risk assessments to identify and mitigate risks inherent in our operations as an online school.

Scope:

This policy applies to all school activities including:

- Online lessons and immersive environments
- Use of digital platforms and tools
- Student safeguarding and welfare
- Head office operations
- Cyber Essentials & Access Control

1 Purpose

The purpose of this policy is to outline how we use risk assessments in order to (a) promote the health and safety of all pupils, including those in the EYFS, staff, parents and visitors and (b) safeguard the welfare and pastoral care of all pupils.

Not only is it a legal requirement for schools to carry out risk assessments, but we believe that the effective use of risk assessments is the best way to identify and minimise risks and prevent harm.

They can cover our pupils, our buildings, our digital & virtual learning environments, our staff, visitors and parents, as well as our daily routines and all school events and visits offsite.

Sophia High School and Sophia Technologies are fully committed to promoting the welfare, health and safety of all those in our community so that high quality education can take place.

Our highest priority lies in ensuring that everything within the school environment is delivered in a safe manner that complies both with the law and with best practice.

A risk assessment is a formal examination of the factors which may cause harm to people. It involves setting out the ways in which these factors can be minimised and managed and assessing the adequacy of current procedures.

2 The School's Duties

The school is under a duty to safeguard and promote the welfare and health and safety of all children and young people in the school. Its main obligations in this regard are set out in Part 3 of the Education (Independent School Standards) Regulations 2014 and in Keeping Children Safe in Education (September 2016, as amended and recently updated in 2026) and associated Department for Education guidance.

The school's duties include (a) supporting children's physical and mental health and emotional well-being; (b) protecting children from harm and neglect; (c) ensuring that all forms of corporal punishment are prohibited; (d) encouraging children to contribute positively to society; (e) providing a safe and healthy environment; (f) improving the provision for disabled children; and (g) managing welfare concerns effectively.

2.2 The school is also under a duty to look after the health and safety of its staff, parents and visitors. Its main obligations in this regard are set out in the Health and Safety at Work Act 1974 and associated statutory instruments, and Health and Safety Executive guidance. [DfE Guidance](#) (April 2022)

2.3 This policy covers the school's duties set out in the [Early Years Foundation Stage Statutory Framework for Group and School-Based Providers](#) (September 2025) and takes into account [DfE Guidance to Schools around Remote Education](#) (Updated August 2024). As of 1st September 2026, Schools are required by the DfE to follow DfE Statutory Guidance on [Use of Mobile Phones in Schools](#), and Sophia High School has adapted this guidance for the online setting.

2.4 This policy is drawn up and implemented in accordance with the above regulations and the Management of Health and Safety at Work Regulations which requires schools to carry out suitable and sufficient assessments of all the significant risks to employees.

3 Policy:

What is a risk assessment and why do we need one?

3.1 A risk assessment is a tool for conducting a formal examination of the harm or hazard to people (or an organisation) that could result from a particular activity or situation.

- A hazard is something with the potential to cause harm (e.g. fire).
- A risk assessment looks at both the likelihood of a risk occurring and the seriousness of the outcome should the risk occur (e.g. loss of life, destruction of property).
- Risk control measures are the measures and procedures that are put in place in order to minimise the consequences of unfettered risk (e.g. staff training, clear work procedures, heat detectors, fire alarms, fire practices, gas and electrical shut down points and insurance).

3.2 Accidents and injuries can ruin lives, damage reputations and cost money. Risk assessments are a fundamental part of any school's procedures – they make good sense and they enable schools to focus on prevention rather than reacting when things go wrong. In many cases risk assessments enable schools to implement simple measures which are easy to implement and which are very effective.

3.3 Our risk assessments are reviewed and updated regularly. It will be clear when risk assessments should be completed and by whom, any system of authorisation, recording procedures, training for staff and a system for monitoring and evaluating effectiveness.

3.4 All staff and pupils receive training to ensure they are competent and confident in assessing and managing risk appropriate to their needs.

3.5 Risk assessments will cover all matters considered of risk to the school community. Our unique Digital Education Environment is taken into account when creating our school risk assessments. Examples of these are set out below.

4 Procedure and Responsibilities

4.1 There are numerous activities carried out in our school, each of which requires a separate risk assessment.

The most important of these cover:

- Pupil welfare (online safety, supervision, mental wellbeing);
- Health and safety (Ergonomics, equipment, Head Offices Premises);
- Recruitment;
- Safeguarding (Prevent, bullying);
- Lessons and educational activities (online learning, virtual reality based learning);
- Early years (Online Screen Time, Wellbeing);
- Breaks and supervision (time away from screens);

4.3 All staff receive regular induction and refresher training in both general risk assessments and in those risk assessments tailored to their specific areas. Induction and refresher training also covers safe working practices, communication, health and safety notices and equipment.

4.4 We aim to provide a positive, supportive and secure environment in which children and young people can learn and develop, and become equipped with the skills to enable them to protect their own welfare and that of others. Further information in relation to this is captured in our Safeguarding Policies.

5 First Aid and Medical Incidents

5.1.1 The school has risk assessments for first aid. Accident forms are maintained in the Head Office and any accident reports are passed to the Health and Safety Coordinator.

5.1.2 The school has a separate policy which explains the procedures that we would follow in the event of a medical emergency.

5.1.3 We ensure that safe working and ergonomic information is shared with students, staff and families to ensure a safe working area is provided during remote education and all stakeholders are aware of our policies, including Lone Working Policy, which relates to those working remotely.

5.2 Our safeguarding: child protection policies and training for all staff form the core of our child protection risk management. Safer recruitment policies and procedures ensure that the school is not

exposed to the risk of employing staff who are unsuitable, barred or prohibited from working with children, and are not allowed to work in the UK.

5.3 PSHE/Holistic Horizons lessons: will be used alongside form periods and subject specific lessons to teach pupils to understand and manage risks (including those associated with e-safety, substance misuse, sexual exploitation, terrorism, domestic violence, female genital mutilation, gang activity, water, fire, road and railway, resist pressure, mental health, make safer choices and seek help if necessary).

5.4 Security: Google for Education risk assessments cover all areas of the school digital education platform on Google for Education Workspace.

5.5 Maintenance: risk assessments and training arrangements are in place for Head Office work equipment and owned by the Building Management Company IWG, The Engine Room, as required by the school site and maintenance team, as well as for manual handling, working at height, control of contractors on site, electricity, gas, water and the control of substances hazardous to health (COSHH).

5.7 Working practices: risk assessments are held by our Business Management Team required for working at height and lone working at Head Office. The Building has 24-7 security.

5.8 Remote staff: risk assessments are required for the display screen equipment and cables used by those staff (primarily office-based) who spend the majority of their working day in front of a screen. All Staff undertake Display Screen Assessments annually.

6 Activities - Virtual Reality Based Learning

6.1 We carry out a range of activities and all hazards are assessed and suitable control measures are put in place for our Online and Metaverse Based Learning Environments. Children and young people are always given a safety briefing before participating in risky activities, and are expected to use appropriate equipment (where required) and to follow instructions.

6.2 Supervision of Breakout Rooms and Collaborative Online Learning

Breakout rooms are an integral part of the school's delivery model, enabling paired and small-group collaborative work in line with the pedagogy of the Online Learning Policy. The school's approach to safeguarding within breakout rooms follows the principles of Keeping Children Safe in Education: **'supervision that is reasonable, proportionate and appropriate to the setting, rather than continuous surveillance of every pupil interaction'**; the same standard that applies to group work, corridors and shared spaces in a physical school.

The following controls apply whenever breakout rooms are in use:

1. The class teacher retains host control of the whole session at all times, remains present in the main lesson throughout, and moves between breakout rooms on an unannounced basis, as a teacher would circulate between groups in a physical classroom.

2. Breakout groups are kept deliberately small, consistent with the school's small-group model.
3. Every pupil retains an immediate exit at all times: any pupil may leave a breakout room and return to the main room, or leave the lesson entirely, at any moment. Pupils learn from home, with a parent or carer contactable as set out in the Online Learning Policy.
4. All pupils are taught, and sign an age-appropriate Digital Safety Agreement committing to, the expectation that they report immediately to an adult anything that makes them uncomfortable, in a breakout room or anywhere else online. The school's behaviour and anti-bullying expectations apply in breakout rooms exactly as they do in the main classroom and in a physical school.
5. Concerns raised about conduct in breakout rooms; by a pupil, parent or member of staff; are followed up promptly under the school's Safeguarding and Child Protection Policy and Behaviour Policy, and grouping arrangements may be adjusted while any concern is looked into.
6. Structured weekly parent contact provides a regular, reliable route through which concerns about peer interactions are surfaced and acted upon.

The school keeps this model under review as part of its annual policy cycle and its ongoing risk assessment of remote learning.

7 Specialist Areas

7.1 The Head Office Business Management Company, IWG The Engine Room arranges for specialists to carry out the following risk assessments in liaison with the Sophia Technologies CEO:
Fire safety; Asbestos; and Legionella.

8 Child Protection

8.1 Where a concern about a child's welfare is identified, the risks will be assessed, appropriate action will be taken to reduce those risks, and this will be recorded and then regularly monitored and reviewed. The format of risk assessment may vary according to need but our approach will always be systematic and thorough. All staff who teach or support a child at risk will be kept well-informed of the strategies, approaches and risk assessment. Individual assessments will be kept on child files and will follow a standard process as follows:

What is the welfare issue?

Who might be harmed?

What measures are already in place?

What further action is necessary? By whom? By when?

Progress report (monitoring and review) - Achieved/Not Achieved

8.2 Full details of our approach towards safeguarding and protecting children in accordance with Keeping Children Safe in Education (as amended) are provided in our separate policy and procedure, which is in keeping with LSCB policy. In addition, we have an Anti-bullying and a Behaviour Policy

where further details of our approach can be seen in more detail. Any children and young people who display sexually harmful or problematic behaviour will have a risk assessment management plan in keeping with LSCB requirements, subject to regular review with the relevant external support agencies.

9 Responsibilities

9.1 As proprietor, Sophia Technologies Limited has overall responsibility for (a) safeguarding and promoting pupil welfare and well-being at the school; and (b) ensuring the health and safety of staff, pupils, parents and visitors.

9.2 At an operational level, the Senior Leadership Team will:

- Ensure that all staff are aware of, and adhere to, the school's policies and procedures on pupil health, safety and welfare;
- Ensure that key staff have clearly established roles and responsibilities;
- Ensure that staff are appropriately trained to effectively carry out risk assessments;
- Ensure that, where concerns about a pupil's welfare are identified, the risks are appropriately managed;
- Ensure that staff, pupils, parents and others are consulted, where appropriate, to find practical solutions to welfare issues and health and safety; and
- Ensure that standards of pupil welfare and health and safety at the school are regularly monitored, both at an individual level and globally, to identify trends and issues of concern and to improve systems to manage these.

9.3 This policy must be read and followed by all members of staff and particularly those with a specialist compliance role, such as Leaders, and Designated Safeguarding Lead(s).

9.4 All staff are responsible for taking reasonable care of their own safety, together with that of pupils and visitors.

9.5 All members of staff are responsible for reporting any facilities risks or defects to the school Business Manager.

9.6 The CEO / Chair of the Board is responsible for assessing the major risks to which the school is exposed, evaluating and reviewing the systems in place for managing exposure to major risks.

10 Review of the Risk Assessments and Record Keeping

10.1 All risk assessments are reviewed and recorded annually, when major structural work is planned or in the event of an accident or incident. A separate policy on the management of health and safety describes the arrangements for regular health and safety audits of the fabric of the school, and equipment. Cleaning, Fire Tests and Water Sampling at Head Office are handled by the Business Management Office IWG, The Engine Room.

10.2 Risk assessments in relation to safeguarding and welfare will be maintained by the Designated Safeguarding Lead (DSL) and on the pupil's file where relevant. All other risk assessments will be held by the Senior Leadership Team in a specific risk assessment folder.

Risk Assessment Process:

- Risk assessments will identify hazards, evaluate risk levels, and implement control measures following the standard AS/NZS ISO 31000 framework.
- Assessments will be conducted for regular school activities annually. New activities/changes will be assessed as they arise.
- The CEO has ultimate responsibility for the risk assessment program. Day-to-day management is delegated to the Senior Leadership Team and Head of Technology.
- Risk assessments will be conducted by the Senior Leadership Team, most knowledgeable on the activity.
- Identified actions will be implemented within clear timeframes by risk owners.
- Completed assessments will be approved by school leadership and reviewed annually.

Risk Control:

- Risk reduction measures will follow the hierarchy of controls model of eliminating the hazard, substitution, engineering controls, administrative controls, and PPE.

Training:

- Staff will receive training on conducting online risk assessments during onboarding.
- Refresher training will be provided annually.

Monitoring:

- Subject leads are accountable for risk management in their areas.
- Overall program effectiveness will be monitored via annual audits.

By regularly assessing risks and implementing appropriate controls tailored to our online school environment, we maintain a safe, secure and compliant learning community.
